scribe

scribe tablet arms are compatible with **solara – integra & decra** seat modules – **scribe** has been designed so that it can be used in fixed and telescopic applications – the surface is moulded from a durable phenolic plastic in one piece - with no edge trimmings to come loose the tablet is built for a life time of use.

scribe has an anti-panic feature so that in an emergency - as the user leaves the seat the tablet will automatically return to the stowed position in a controlled fall - leaving the exit clearway un - obstructed.

scribe tablet arms are compliant with BS EN and BIFMA strength and durability codes – the arm can resist a load in excess of 100kg applied when the arm is in the deployed position.

scribe tablet arms are engineered for indoor and outdoor applications - shown here installed with our **solara** seat modules at the Tele2 Arena, Stockholm Sweden.
